

SPECIAL POINTS OF INTEREST:

- ◆ Robust Industry Demand
- ◆ Huge potential in the next 3-5 years
- ◆ Lots of opportunities for Senior & Intermediate resources
- ◆ Good for resources with 2+ experience
- ◆ Potential to earn more than 70K per year
- ◆ Lots of contract opportunities

ASP.NET Skills Upgrade Program (Advanced)

What is ASP.NET?

ASP.NET stands for Active Server Pages. It is developed by Microsoft. ASP.NET is used to create web pages and web technologies and is an integral part of Microsoft's .NET framework vision. As a member of the .NET framework, ASP.NET is a very valuable tool for programmers and developers as it allows them to build dynamic, rich web sites and web applications using compiled languages like VB and C#.

Web development is the process by which you can get more features of innovative technology – web design, back end programming and software solution for more business efficiency, simply get more from your website infrastructure by integrating each element.

ASP.NET helps to bring out the real world web applications in documentation time. Stretchy Language Options – ASP.NET allows empowering the existing programming language skills. Different classic ASP which abets barely, interpreted JAVA Script and VB Script at present, ASP.NET abets more than twenty five .NET languages which also includes built-in support for C# which is called as C sharp, Visual Basic.NET and JAVA Script and also it does not requires any tool. Thus it gives an extraordinary litheness in the selection of language.

Current Industry Trends

There is a tide of change that has been stirring in the .NET marketplace over the past 12 months. The market is continuously evolving and the current market conditions have shown the availability of visually active candidates to be at an all time low. As the software industry is trending towards web services and client-side development. There is need of ASP. Net programmers who are skilled enough to incorporate any languages in .NET based applications to create robust and scalable applications which will help business or organizations to get increased revenues and business. .NET is widely used language from Microsoft and heavily promoted at the same time. With new frameworks, most recently .NET Framework 4 gaining traction, there will be a flurry of projects implementing this framework and migrating to this new technology creating opportunities.

Skills that conquer underemployment & unemployment

Skills Upgrade Programs for Everyone

Course Contents

- ◆ Object Oriented Programming with C#
- ◆ Explore in detail different options like inheritance, Encapsulation and Polymorphism.
- ◆ Working with Advance controls in ASP.net as DataList, Dataview and DetailsView controls
- ◆ Working with website navigation
- ◆ Exploring the Navigation controls like Menu control, Sitemap and Treeview control
- ◆ Introduction to JQuery and JavaScript in webpage
- ◆ Web Page Input/Data Validation with JQuery.
- ◆ Introduction to Service Oriented Architecture
- ◆ Introduction to Windows Communication Foundation
- ◆ Explain about how to design and run a WCF service.
- ◆ Explore how to consume a service as a client
- ◆ Introduction to LINQ Query and its uses
- ◆ Introduction to Entity Frame work model and its use

What you'll learn

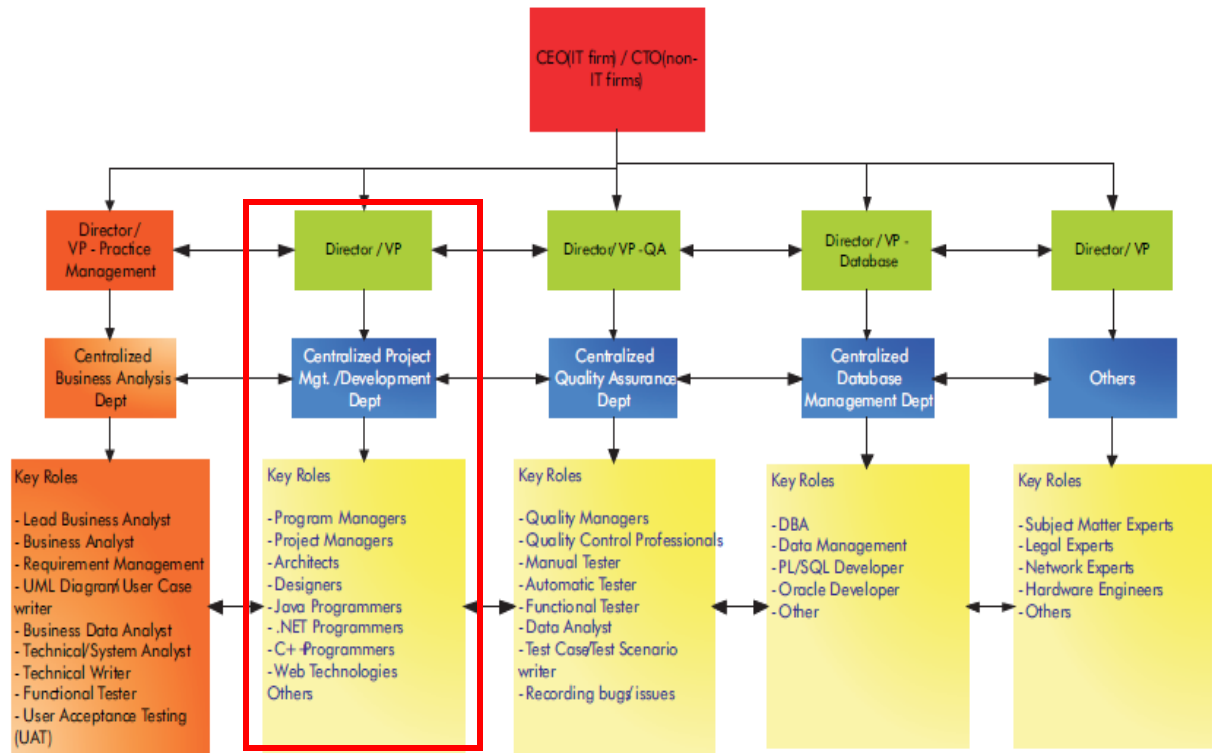

- ◆ How to build dynamic web applications and sophisticated user interfaces with minimal code
- ◆ How to configure web forms authentication and authorization
- ◆ How to deploy web applications with ASP.NET
- ◆ How to build sophisticated user interfaces by configuring controls and extending them with custom code
- ◆ How to integrate data access with data-source controls
- ◆ How to customize security.
- ◆ How to improve the functionality of complex processes
- ◆ How to validate data and handle common tasks

CAREER OPPORTUNITIES:

Who Should Attend

This course is recommended to Analysts and anyone who has knowledge of at least one programming language or has previous IT experience. This practical course will benefit:

- ◆ Programmer Analysts
- ◆ Programmer Analysts/Developers
- ◆ Fresh Graduates from Computer Science degree/diploma
- ◆ Freelancers
- ◆ Graduates from Technology streams
- ◆ Masters in Computer Applications
- ◆ Solution Architects
- ◆ Development Managers

What else you should know

- | | |
|---|--|
| <ul style="list-style-type: none"> ◆ 35 Hrs Duration ◆ Flex Schedules (Weekday & Weekend) ◆ Individual attention ◆ Mock interviews ◆ Hands on Training ◆ Focus on Industry requirements ◆ Interviewing techniques ◆ Recruitment Support | <ul style="list-style-type: none"> ◆ Experienced Instructors ◆ Centrally Located ◆ FREE Reading Material ◆ HRSDC Approved ◆ Tuition Tax Credit ◆ Real World Examples ◆ 24/7 Lab Access ◆ Certification Prep help ◆ Internships available ◆ Access to large network |
|---|--|
